01.09.2015 · A McKinsey Global Institute report finds that $12 trillion could be added to global GDP by 2025 by advancing women’s equality. The public, private, and social sectors will need to act to close gender gaps in work and society.

Racial Disparities in Maternal and Infant Health: A n

The case study analyzes the trends in maternal mortality nationally, the maternal healthcare-delivery system at different levels, and the implementation of national maternal health programmes, including recent innovative strategies. It identifies the causes for limited success in improving maternal health and suggests measures to rectify them. It recommends better ...

Launch of the U.N. Global Humanitarian Overview 2022

Maternal death or maternal mortality is defined in slightly different ways by several different health organizations. The World Health Organization (WHO) defines maternal death as the death of a pregnant woman due to complications related to pregnancy, underlying conditions worsened by the pregnancy or management of these conditions. This can occur either while she is ...

10.11.2020 · Disparities in pregnancy-related deaths for Black and AIAN women increase by maternal age and persist across education levels. For example, the rate for Black women between ages 30 to 34 widens to
Effects of the COVID-19 pandemic on maternal and perinatal health

Malnutrition continues to be the leading risk factor for disease burden in India. It is encouraging that India has set ambitious targets to reduce malnutrition through NNMT. The trends up to 2017 indicate that substantially higher rates of improvement will be needed for all malnutrition indicators in most states to achieve the Indian 2022 and the global 2030 targets.

Global Humanitarian Studies BSc | Undergraduate prospectus

Health is fundamental for a good quality of life. Being free from illness or injury directly affects our capacity to enjoy life. In this entry we provide an overview of the available empirical evidence on aggregate health outcomes, focusing on long-run cross-country data from mortality and morbidity tables; and then provide an analysis of available evidence on health determinants, ...

IWCA

10.03.2020 · Estimates of the global impact vary: early last week, the Organisation for Economic Co-operation and Development (OECD) predicted that Covid-19 will lower global GDP growth by one-half a percentage point for 2020 (from 2.9 to 2.4 percent); Bloomberg Economics warns that full-year GDP growth could fall to zero in a worst-case pandemic scenario.
